Chennai, Tamil Nadu - 600041, India

OBJECTIVE

I am currently pursuing a degree in computer science, focusing on honing my coding skills. Collaboration and effective communication are integral to my skill set. Beyond technicalities, my passion lies in continuous learning, making me adaptable to emerging trends in the tech industry. I am eager to leverage this comprehensive skill set to actively contribute to innovative and impactful projects within the dynamic realm of technology.

INTERNSHIP-EXPERIENCE

- **Wireless Sensor Networking Lab, Computer Division, IGCAR** June 2023
Research Intern Kalpakkam
 - Gained hands-on experience in serial communication and socket programming using Python.
 - Worked on data collection from a wireless sensor base station to analyze network performance.
 - Developed an understanding of wireless sensor networks and network communication protocols.
 - Strengthened skills in network programming, data transmission, and embedded systems integration.
- **Riverstone infotech** Jan 2025 - Apr 2025
Python Development Intern Chennai
 - Worked on an **AI-based project**, fine-tuning an **OpenAI model** to enhance performance for a specific use case.
 - Developed the **backend using Python and Flask**, implementing API endpoints for AI model interaction.
 - Built a **dynamic frontend with React.js and TypeScript**, while using **HTML, CSS, and JavaScript** for styling and interactivity.
 - Integrated the AI model into a **full-stack web application**, ensuring seamless user interaction.

EDUCATION

- **Agni College Of Technology** 2021 - 2025
B.E-Computer Science Engineerinng Chengalpattu, India
 - CGPA: 8.02/10.00
- **Ramaniyam Sankara matirc hr.sec School** 2020 - 2021
High School Education Chennai, India
 - Percentage: 84
- **Ramaniyam Sankara matirc hr.sec School** 2018 - 2019
Senior Secondary Education Chennai, India
 - Percentage: 80

PROJECTS

- **Test Platform using Python:** [G]
Tech stack:Python,Tkinter
 - Developed an interactive quiz application using Python's Tkinter library with a user-friendly GUI.
 - Implemented secure user registration and login modules for efficient access management.
 - Designed a timed quiz feature with real-time countdown and automatic submission functionality.
 - Enhanced application reliability through intuitive navigation and robust error handling.
- **Cloud-Based Pizza Ordering Tool** [G]
Tech stack:AWS,Python
 - Created a **chatbot for ordering pizza** using **AWS Lex and Lambda**.
 - Lambda function processes orders, calculates the total (with offers), and returns a bill in **JSON format**.
 - Automated order management with cloud integration.
- **Heart Disease Prediction Using Machine Learning** [G]
Tech Stack:Python,ML algorithm,Naive bayes,KNN...
 - Implemented **ML algorithms** to predict heart disease based on clinical data
 - Used libraries like **Scipy, Matplotlib, and Pandas** for analysis and visualization.
 - Explored different ML models to improve prediction accuracy.
- **YouTube Statistics Analysis Using Django** [G]
Tech stack:Python,Django,Html,css,JavaScript
 - Built a **web-based dashboard** to display key statistics of a YouTube channel. .
 - Fetches data like **subscribers, total views, and video uploads**. using **Django framework** for backend processing.

SKILLS

- **Programming Languages:** Python,C,Java,C++,Bash
- **Web Technologies:** HTML,CSS,JavaScript,React.js
- **Database Systems:** SQL
- **Cloud Technologies:** AWS
- **DevOps & Version Control:** Git,Github,Jenkins
- **Miscallenous:** Linux,Data structure and Algorithm,ComputerNetworks

CERTIFICATIONS

- **Python (Basic) – HackerRank**
- **SQL (Basic) Certificate**
- **Problem Solving(DSA)**
- **Software Engineer Intern**
